## ON-SITE GENERATION OF HYDROGEN PEROXIDE USING ONLY WATER, ELECTRICITY AND AIR

### Generate your own Peroxide UltraPure™

- ⦿ Requires only water and electricity inputs
- ⦿ Safe to use, no handling of toxic chemicals
- ⦿ No stabilizers or other additives - breaks down to pure water and oxygen
- ⦿ Eco-friendly, suitable for organic agriculture
- ⦿ Improved protection against water-borne pathogens
- ⦿ Effective removal of bio-foul and bio-films
- ⦿ Increased Dissolved Oxygen levels
- ⦿ Strong cost savings as compared to chemical inputs

### Recirculating Irrigation Systems

**GOgen** is effective and safe to use in recirculated irrigation systems. Peroxide UltraPure™ requires no stabilizers or other additives and breaks down to pure water and oxygen following use, leaving no unwanted traces and buildup behind.

### Cost savings, supply chain independence

Unlike bulk chemical products, there are no recurring chemical purchase costs, or exposure to price and supply volatility. Thanks to high energy efficiency and low maintenance, you will also save on running and labor costs. All this adds up to a fast return on investment followed by substantial cost savings.

**GOgen** is classified as an on-site pesticide device under FIFRA. Peroxide UltraPure™, generated exclusively by the **GOgen** generator, has been OMRI Listed® for use as a plant disease control or as an algicide, disinfectant, or sanitizer.
